Education must bring out the latent potential of the students to the fore. Therefore, the educational institutes have to focus on leveraging knowledge, research and innovation while providing the conducive environment for the same. The entire society rests on the shoulders of these educational institutions where the young minds are being nurtured to serve the nation. The entire education system of India especially the technical institutes have the onus of facilitating overall development of intellectual, ethical, moral and human aspects of the personality of the students.

We at Faculty of Engineering & Technology believe in participative learning, promoting inquisitive spirit, experimentations, research and development rather than drab theoretical teaching and transferring of information. It is rightly said that the child is not vessel to be filled but a lamp to be lit.

Every effort is to make the students connect to their inner being, understand their potentials and shine in this world. We encourage them to become job givers instead of job seekers as this is the need of the hour. We teachers and students together can restore the glory and eminence of our Country when we were acknowledged as the *Vishwa Gurus*, when the oldest universities of this world *Taxila and Nalanda* took birth in our Bharat. Let us take pledge to rebuild our nation and thus live up to the expectations and the trust reposed in us being the educators and learners.
