

Drone Pilot Training

Drone Pilot Certification is currently required in India to operate any Remotely Piloted Aircraft (RPA), commonly known as a DRONE. Operating a drone without the required certificate may result in substantial penalties, the seizure of the drone, and possibly even prison. In light of the rapid development of unmanned aerial vehicle technology, we intend to introduce a new certification course in Drone Pilot Training in Bhai Jaita Subharti Engineering College (BJSEC), Subharti University, Meerut. Join our recognized drone pilot training program to boost your drone dreams and enhance your pilot expertise. Our skilled and trained staffs of specialist trainers strive to push you to new heights.

Career Opportunities

Drones have evolved swiftly over the years, from a military innovation to an entertaining hobby to a technology that is altering commercial enterprises and futures potential in the industry is endless such as Surveillance, Land survey, GIS and Mapping, etc.

Course Eligibility

10th pass

Training FEE

Highlights

- Qualified Instructors
- In-depth knowledge of drones and their commercial applications
- Theory Sessions
- Flight Simulator Sessions
- Practical Lab Session
- Practical Flying Sessions
- Simulator Training
- Drone Assembly and Maintenance Training
- 100% assistance in Job placement
- **Duration of course**

The duration of this training course will be 15 days, with online and offline theory, field evaluation, simulation/modelling, laboratory sessions, and flight operation.
