(57) Abstract :

Accordingly, embodiments herein disclose a luggage trolley with foldable net, comprising of: a plurality of wheels (110) which is configured to place a base portion of a body (100); a foldable frame (120) configured to cover the body (100) and comprising an upper frame portion and a lower frame portion. Further, the invention may include a sleeve surrounding the foldable frame (120) substantially completely around the periphery of the foldable frame (120); and a rod removably connected to the sleeve. Further, the invention may include a strap connecting the sleeve adjacent to the upper frame portion and the sleeve adjacent to the lower frame portion. The strap is arranged to cooperate with the rod to urge the upper frame portion into its erected position away from the generally horizontal surface. The foldable frame (120) is self-standing and easily collapsible for storage or transit and can be used indoors or outdoors.
