(57) Abstract :

Accordingly, embodiments herein disclose an energy saving bain-marie with the help of hot water supplying through a burner, comprising of: a gas cylinder for supplying the gas to a burner (130); a means for heating a storage (110) and liquid or water (120) contained therein, comprising at least one burner (130) arranged outside the storage (110) in contact therewith. Furthermore, the invention may include and a plurality of containers or bowls (140) arranged inside the storage (110) and containing the food to be heated/cooked in the bain-marie (100). The burner (130) is to heat the movable water (120) between the inlet points of water to the bain-Marie (100). The storage (110) defines a surface which is convex towards the outside of the storage (110).
