

Program Outcomes (POs)

B.Sc. Computer Science

PO 1: Knowledge of Computing Fundamentals

Ability to understand core concepts of programming, data structures, algorithms, databases, operating systems, networking, and software engineering.

PO 2: Problem Analysis, Design & Development of Solutions

Ability to analyze complex computational problems using mathematics, logical reasoning, and structured methodologies. And Ability to design, develop, test, and deploy software applications fulfilling real-life user needs and technical specifications.

PO 3: Conduct Investigations & Research

Ability to use research methodologies, data analysis techniques, and scientific approaches to investigate computing-related problems.

PO 4: Professional Ethics

Understand and adhere to ethical principles, cybersecurity practices, data privacy norms, and professional responsibilities.

PO 5: Entrepreneurship & Innovation

Ability to apply computing knowledge creatively to develop innovative ideas, startups, and technological solutions.
